

功课和练习

第12-3课

英寸, 英尺和码

再看! You can use a yardstick to measure objects to the nearest foot.

Remember, 1 foot is 12 inches long.
So 2 feet are 24 inches long.
1 yard is 36 inches long
or 3 feet long.

This string is about
2 feet long.

Think: Is the string
closer to 2 feet long or
closer to 3 feet long?

This string is about
3 feet long.

家庭活动 Have your child identify three objects at home that are about 1 inch, 1 foot, and 1 yard in length.

Estimate the height or length of each object.
Then measure.

1. the height of the doorway

Estimate: about _____ feet

Measure: about _____ feet

2. the height of a chair

Estimate: about _____ feet

Measure: about _____ feet

3. the width of a window

Estimate: about _____ feet

Measure: about _____ feet

4. © **MP.2 Reasoning** Draw a picture of and name objects that have these lengths.

more than 6 inches but less than 1 foot

more than 1 foot but less than 2 feet

more than 2 feet but less than 1 yard

5. **Math and Science** Jay planted sunflowers in a sunny spot. He gave them water and watched them grow to be taller than he is. He measured the heights of the plants when they were full-grown. Were they 8 inches or 8 feet tall? Explain.

6. **Higher Order Thinking** Which tool would you choose to measure the number of inches around your waist? Explain.

7. © **Assessment** Use a ruler. About how long is the crayon?

- Ⓐ about 1 inch
- Ⓑ about 2 inches
- Ⓒ about 4 inches
- Ⓓ about 6 inches
