

# 功课和练习 第12-4课

使用不同的方法测量单位长度

**再看!** You can measure using different units.

Derrick measured the gift box in inches and in feet.

The gift box is about \_\_\_\_\_ inches long.

The gift box is about \_\_\_\_\_ foot long.

It takes more inches than feet to measure the gift box because an inch is a smaller unit. If you use smaller units, you need to use more units.

**家庭活动** Have your child use a foot ruler to measure objects in both inches and in feet. Then ask your child if he or she used more inches or more feet to measure each object.

Measure each object using different units. Circle the unit you need more of to measure each object.

1.

about \_\_\_\_\_ feet      about \_\_\_\_\_ yards

more feet

more yards

2.

about \_\_\_\_\_ inches      about \_\_\_\_\_ feet

more inches

more feet

3. © **MP.3 Explain** Trina says that her dollhouse is about 8 yards tall. Is Trina's estimate a good estimate? Explain.

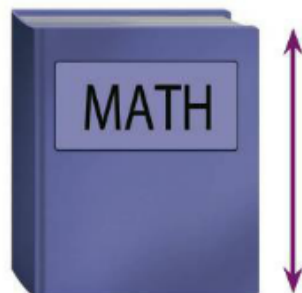

---

---

---

4. **Higher Order Thinking** Sarah wants to measure the length of her math book. Should she use inches, feet, or yards? Explain.

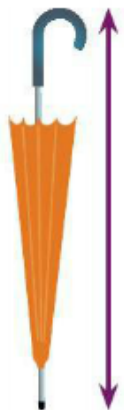

---

---

---

5. © **Assessment** Which unit would you need the most of to measure the height of the umbrella?

- (A) inches
- (B) feet
- (C) yards
- (D) all the same

6. © **Assessment** Which is the best estimate for the length of a pen?

- (A) about 10 inches
- (B) about 6 inches
- (C) about 5 feet
- (D) about 10 yards
