

功课和练习 第12-6课 厘米和米

再看! You can use a meter stick to measure length in meters.

Step 1: Line up a meter stick with one end of an object.

Step 2: Mark the spot where the other end of the meter stick sits on the object.

Step 3: Then move the meter stick so the 0 end starts where you marked.

You can measure to the nearest unit.

The table is about 2 meters long.

家庭活动 Have your child show you an object at home that is about a centimeter long and another object that is about a meter long.

Estimate the height or length of each object. Then measure.

1. the length of a table

Estimate:

about _____ meters

Measure:

about _____ meters

2. the height of a chair

Estimate:

about _____ meters

Measure:

about _____ meters

3. the length of your room

Estimate:

about _____ meters

Measure:

about _____ meters

4. **Math and Science** Sarah put bean plants by a window with sunlight. She watered them every other day. Sarah measured the height of the plants after 3 weeks. Do you think they measured 12 centimeters or 12 meters? Explain.

5. © **MP.2 Reasoning** What would be a reasonable estimate for the length of a calculator?

about _____ centimeters

6. **Higher Order Thinking** Do you need fewer centimeters or fewer meters to measure the height of a doorway? Explain.

7. © **Assessment** Which measures are reasonable estimates for the length of a bedroom? Choose all that apply.

- 4 centimeters 3 meters
 4 meters 30 centimeters
