

功课和练习  
第14-5课  
从图表得出结论

**再看!** You can draw conclusions from data in a graph.

This picture graph shows students' favorite types of books.

Write how many students chose each type of book.

The key shows that each book is 1 student's vote. Use the key to count the number of votes.

Each  = 1 vote

**家庭活动** Use the Favorite Type of Book picture graph to ask your child questions about the data. Encourage your child to explain each answer.

Use the picture graph above to answer the questions.

1. Which was the least favorite type of book?

\_\_\_\_\_

2. Which type of book did most students vote for? \_\_\_\_\_

3. How many more students voted for biography than for adventure?

\_\_\_\_\_

4. If each student voted one time only, how many students voted in all?

\_\_\_\_\_

Use the bar graph to solve each problem.

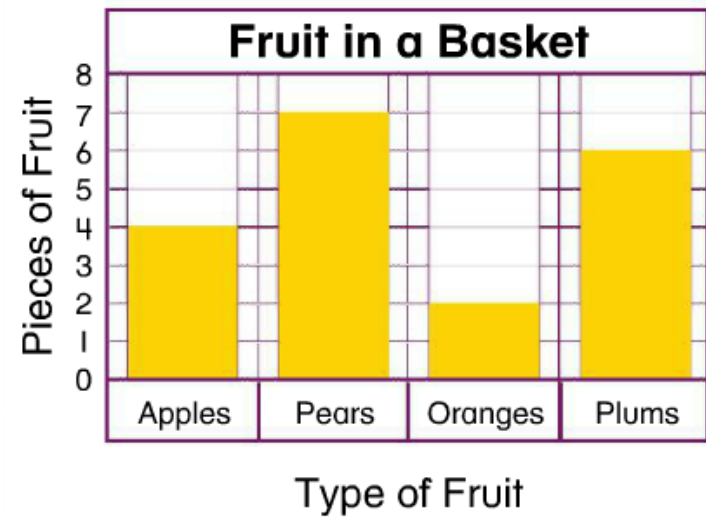

5. © **MP.1 Make Sense** Complete each sentence.

The fruit basket has \_\_\_\_\_ apples and \_\_\_\_\_ pears.

The fruit basket has \_\_\_\_\_ oranges and \_\_\_\_\_ plums.

6. Write the order of the type of fruit from the least number to the greatest number.

\_\_\_\_\_

7. How many apples and oranges in all are in the basket?

\_\_\_\_\_

8. Maria uses 4 of the pears to make a pie. How many pears are left in the basket?

\_\_\_\_\_

9. **Higher Order Thinking** Does it matter how you order the data in a bar graph? Explain.

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

10. © **Assessment** How many fewer apples than plums are in the basket?

\_\_\_\_\_
