

功课和练习

第14-6课

推理

再看! You can reason about data in the picture graph to write and solve problems.

How many more votes
did the Tigers get than
the Lions?

Each  = 1 vote

Tigers 10 Lions 8

$$\underline{10} - \underline{8} = \underline{2}$$

The Tigers got 2 more votes than the Lions.

Count the symbols for the votes for Tigers and Lions on the picture graph. Then subtract.

家庭活动 Look at the picture graph for team names together. Ask your child to find how many more votes there are for Wolves and Lions combined than there are for Tigers. Have your child explain how to find the answer.

Write and solve problems about the data in the picture graph above.

1. _____

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad}$$

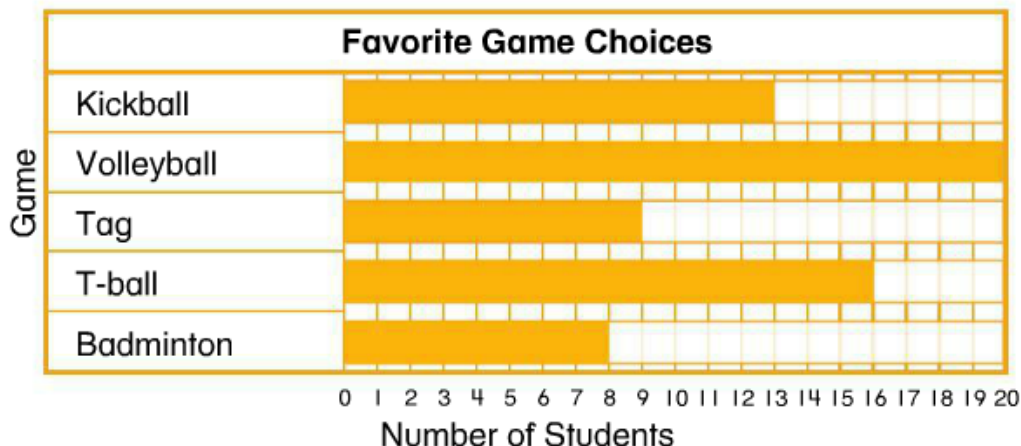

2. _____

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad}$$

Gym Games

Ms. Winn has to cut one game from gym class. So, she asked students to choose their favorite game. The bar graph shows the results. Each student voted only once. Which game should she cut and why?

3. **MP.1 Make Sense** How many students voted for each game? Tell how you know.

4. **MP.3 Explain** Ms. Winn wants to cut tag from gym class. Do you agree? Explain.

5. **MP.2 Reasoning** How many fewer students chose tag and badminton combined than volleyball? Explain your reasoning.
