

功课和练习  
第4-6课  
练习加法

再看！ Find the sum.

$$\begin{array}{r} 34 \\ 29 \\ 18 \\ + 6 \\ \hline 60 \\ + 27 \\ \hline 87 \end{array}$$

**Step 1:** Add the tens in any order.

$$30 + 20 + 10 = 50 + 10 = 60$$

**Step 2:** Add the ones in any order.

$$\textcircled{4} + 9 + 8 + \textcircled{6} = ?$$

**Step 3:** Add the partial sums.

Think:  $60 + 27 = ?$

$$60 + 20 + 7 = 87$$

So,  $34 + 29 + 18 + 6 = 87$ .

Add in any order.  
It helps to make a 10.  
 $4 + 6 = 10$

家庭活动 Write  $22 + 33 + 18 + 7$  on a sheet of paper. Ask your child to show you how to find the sum.

Add using partial sums.

1.

	Tens	Ones
	2	8
	1	$\textcircled{3}$
+		$\textcircled{7}$
<b>Tens:</b>	3	0
<b>Ones:</b>	1	8
<b>Sum:</b>		

2.

	Tens	Ones
	3	4
	2	6
+		7
<b>Tens:</b>		
<b>Ones:</b>		
<b>Sum:</b>		

3.

	Tens	Ones
	3	1
	2	4
	1	1
+		9
<b>Tens:</b>
