

功课和练习 第6-2课

2 位数和 1 位数的
数字相减模型

再看! Regroup when there are not enough ones. Find $52 - 8$.

Step 1

Show 52. There are not enough ones to subtract 8.

Step 2

Regroup 1 ten as 10 ones.

Step 3

Subtract the ones. Then subtract the tens.

So, $52 - 8 = 44$.

家庭活动 Write $22 - 6$ in vertical form on a piece of paper. Ask your child to show you how to find $22 - 6$ using small objects such as paper clips, buttons, or marbles. Have your child write the difference.

Subtract. Draw place-value blocks to show your work. Regroup if needed.

© **MP.4 Model** Solve each problem. Draw place-value blocks to model.

3. There are 40 students in the gym. 9 students are jumping rope. How many students are **NOT** jumping rope?

Tens	Ones
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>

_____ students

4. Kate writes on 7 pages in her notebook. There are 34 pages in her notebook. How many pages are blank?

Tens	Ones
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>

_____ pages

5. **Higher Order Thinking** Write a subtraction story about $45 - 8$. Then solve.

6. © **Assessment** You draw place value blocks to model each subtraction. Choose all of the problems that need regrouping to show the difference.

$62 - 4 = ?$

$58 - 7 = ?$

$75 - 7 = ?$

$35 - 5 = ?$
